Assembly Instructions

1) Slide the O-ring onto the front end of the plug housing until it seats up against the ridge on the plug housing.

2) Slide the coupling ring over the plug housing. NOTE: Make sure the front of the coupling ring can slide past the ridge on the plug housing. If not, it is inserted the wrong way.

3) Slide the sealing nut, sealing ring and plug housing/coupling ring over the front end of the cable in the following order:
   1st sealing nut
   2nd sealing ring
   3rd plug housing / coupling ring

4) Terminate the RJ45 plug to the cable. NOTE: See supplemental termination guide for cable termination instructions.

5) Slide the RJ45 plug into the back end of the insert until it snaps into place.

6) Slide the insert/RJ45 plug into the front end of the plug housing until it snaps into place.

7) Push the sealing ring into the rear of the plug housing. NOTE: No part of the sealing ring should extend past the rear of the plug housing.

8) Screw the sealing nut onto the plug housing.
