## HPC Series Panel Mount Connectors

Switchcraft introduces the HPC Series or *High Power Connector* panel mount connectors. The HPC Series is a 20A rated, touchproof connector series designed to meet IEC 529 and IEC 1010-1 safety requirements. Completely compatible with Neutrik® SpeakOn® cable connectors, the HPC Series is available in a wide variety of terminations. A built-in gasket offers additional protection from harsh environments, meeting IP26 ratings. Available in 4 poles. As an option, a 0.200" deep flange allows the end user to mount the connector from the rear of the panel and still allow proper mating of the cord plug.

### Features and Benefits

- Mates with Neutrik® SpeakOn® cord plugs
- Available with .187" and .250" faston terminals, straight or Right Angle PC terminals
- Built-in gasket meets IP26 environmental ratings
- Available with 0.200" deep flange for easier rear panel mounting
- Available with or without countersink mounting holes
- Touchproof design meets IEC 529 and IEC 1010-1 safety requirements
- Rated at 20A
