

Switchcraft®

SC600 Dual Adapter Box

Features

- Combines 14 commonly used audio adapters into one device
- Laser-etched product labeling
- Rugged extruded aluminum enclosure

SC600 Dual Adapter Box

The SC600 Dual Adapter Box from Switchcraft® combines many of the most commonly used audio adapters into one device. Each side of the box functions separately and features a 3.5mm ($\frac{1}{8}$ ") stereo jack, a $\frac{1}{4}$ " stereo jack, two $\frac{1}{4}$ " mono jacks, and two RCA jacks.

Any of the connections on the SC600 can be used as inputs or outputs, enabling you to adapt audio from one device to another. The SC600 can also be used as a passive splitter to send audio from one device to several devices with different connections.

Built by hand in Chicago, USA
